Areas of Research and Publication

Dr. Nelson's research interests include all aspects of reproductive medicine including:
Optimization of pregnancy rates through individualization of IVF treatment protocols
Advanced reproductive technologies including extended culture of human blastocysts, Preimplantation Genetic Diagnosis (PGD), and blastocyst transfer
Third party reproductive solutions, including egg donation for women of advanced maternal age, gestational surrogacy, and embryo donation
Fertility preservation through sperm banking as well as ovarian stimulation followed by oocyte cryopreservation and storage
Gender selection
Dr. Nelson co-authored one of the largest clinically relevant studies determining optimal ovarian stimulation protocols for IVF
Dr. Nelson has authored numerous peer-reviewed articles and has presented his findings at professional conferences which have included both national and international audiences
Dr Nelson is the longest standing member of HRC Fertility, having joined the practice in 1992.
For the past two decades he has delivered comprehensive personalized care to fertility patients all over the world.
